1) Executive Summary

This report summarizes Instagram performance for Lazy Faire Magazine across two windows: a 12-month view (February 1-January 31) and a 90-day view (November 1-January 31).

Over the past 12 months, the account recorded **152.0K views**, **10K in reach**, **931 content interactions**, **3.4K visits**, and **178 new followers**. Content interactions and followers increased by more than 100%. In the most recent 90 days, insights show **85,221 views** and **718 interactions**, with posts driving the majority of both views (70.3%) and interactions (98.3%). Audience activity is concentrated during daytime and early evening, with the highest "most active" hour on average shown at **3PM**.

2) KPI Snapshot

2.1 Key Results (12 months: Feb 1 - Jan 31)

Source: Meta Business Suite

- **Views:** 152.0K
- **Reach:** 10K
- **Content interactions:** 931
- **Profile visits:** 3.4K
- **Follows:** 178

2.2 Key Results (90 days: Nov 1 - Jan 31)

Source: Instagram Insights

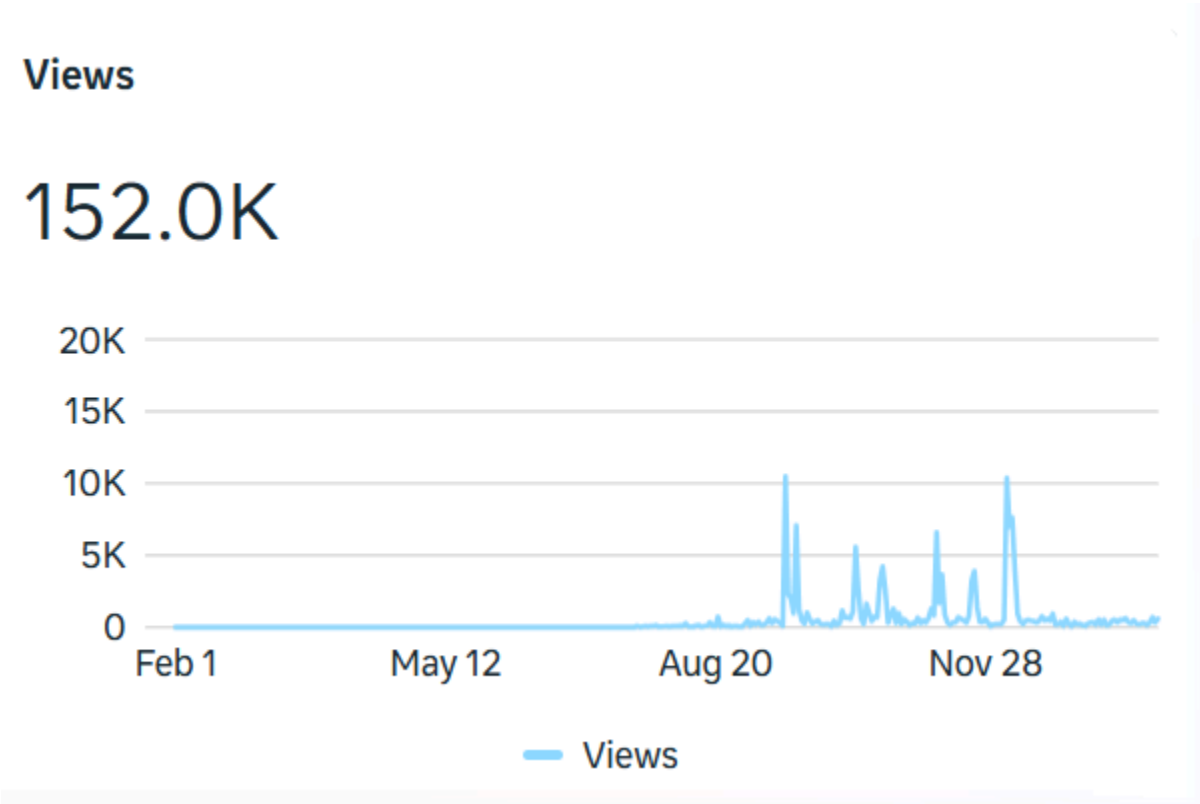

- **Views:** 85,221
- **Accounts reached:** 4,734
- **Interactions:** 718
- **Accounts engaged:** 215
- **Profile visits:** 1,155
- **External link taps:** 83
- **Total followers (lifetime):** 763

3) 12-Month Performance Trends

4) 90-Day Account Insights

4.1 Views and content type contribution

In the last 90 days, Instagram shows **85,221 views** and **4,734 accounts reached**, with views coming slightly more from **non-followers** (**52.7%**) than **followers** (**47.3%**).

By content type, **posts drive most views** (**70%**), followed by **stories** (**27.2%**), with **reels** (**1.8%**) contributing a small share in this window.

Figure 6:

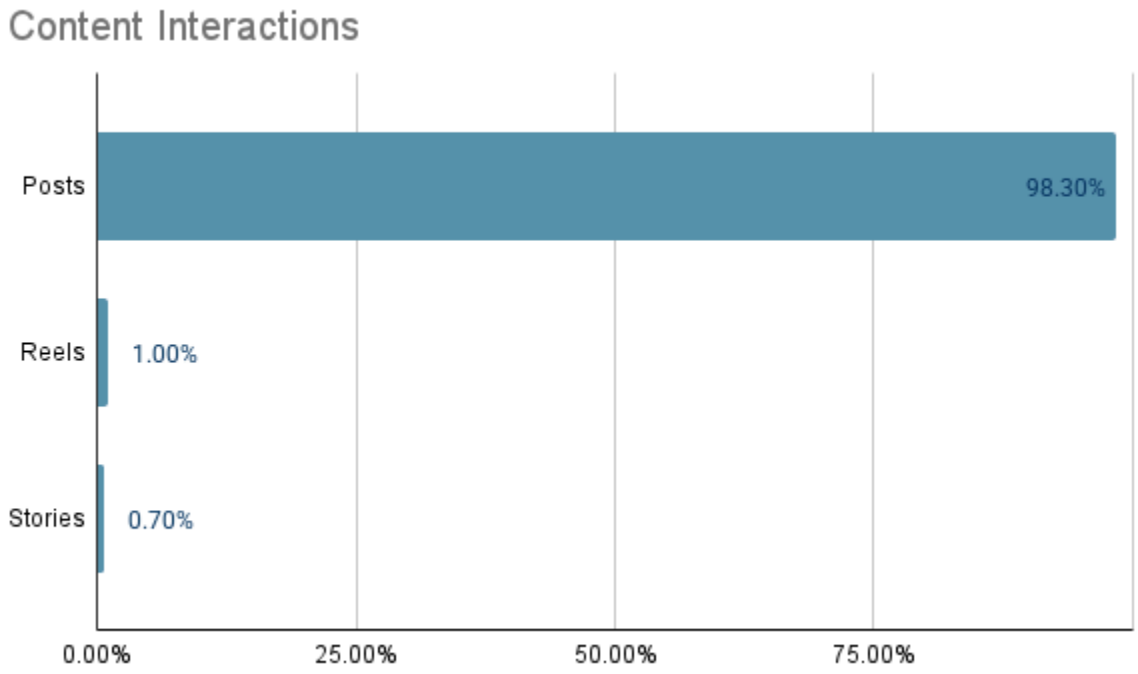

4.2 Interactions and content interaction split

Instagram reports **718 interactions** in the 90-day period.

Most interactions are from **followers** (**80.9%**), and posts account for **98.3% of content interactions** (reels ~1%, stories ~0.7%).

Figure 7:

4.3 Profile activity

Over the 90-day window, the account recorded **1,155 profile visits** and **83 external link taps**, showing measurable conversion from profile interest to click-through.

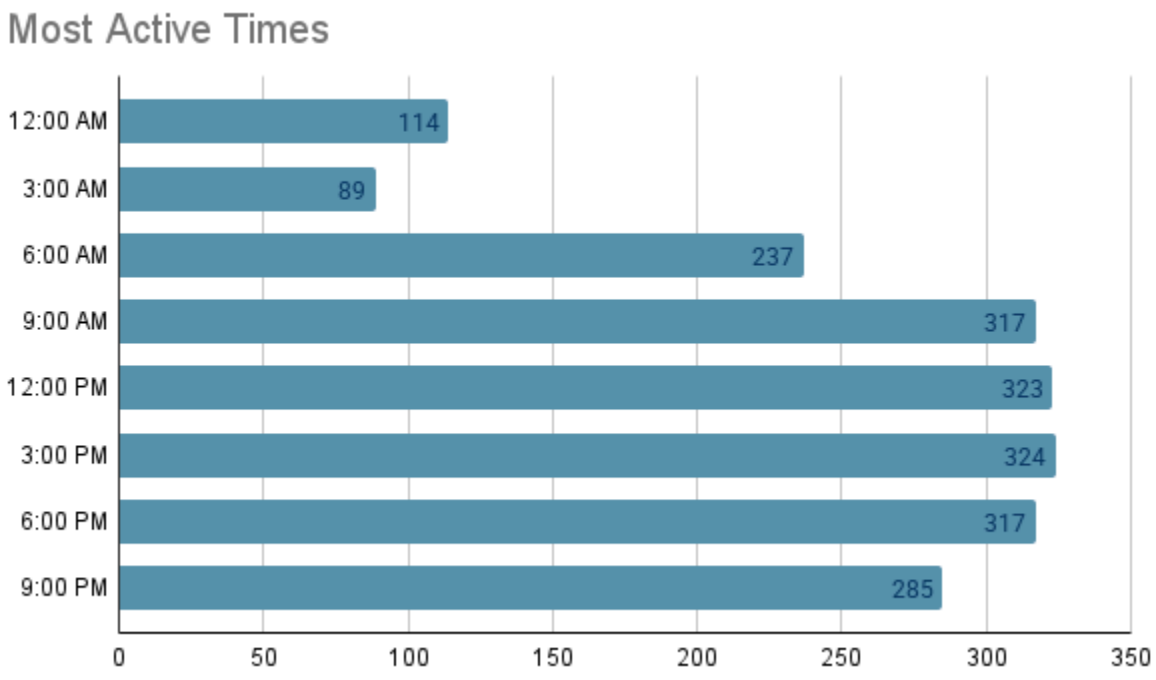

5) Audience Activity Analysis

Instagram "Most active times" indicates consistently strong activity from late morning through evening. On average, the largest activity level is shown at **3PM**, with similarly high activity at **9AM, 12PM, and 6PM**.

Recommended posting windows:

- **Primary window:** 12PM - 6PM (strongest activity)
- **Secondary window:** 9AM - 12PM (high lead-in activity)

Figure 9:

6) Stories Performance

Instagram's content overview shows Stories brought in **21.9K views** and **731 users were reached** over the one-year period.

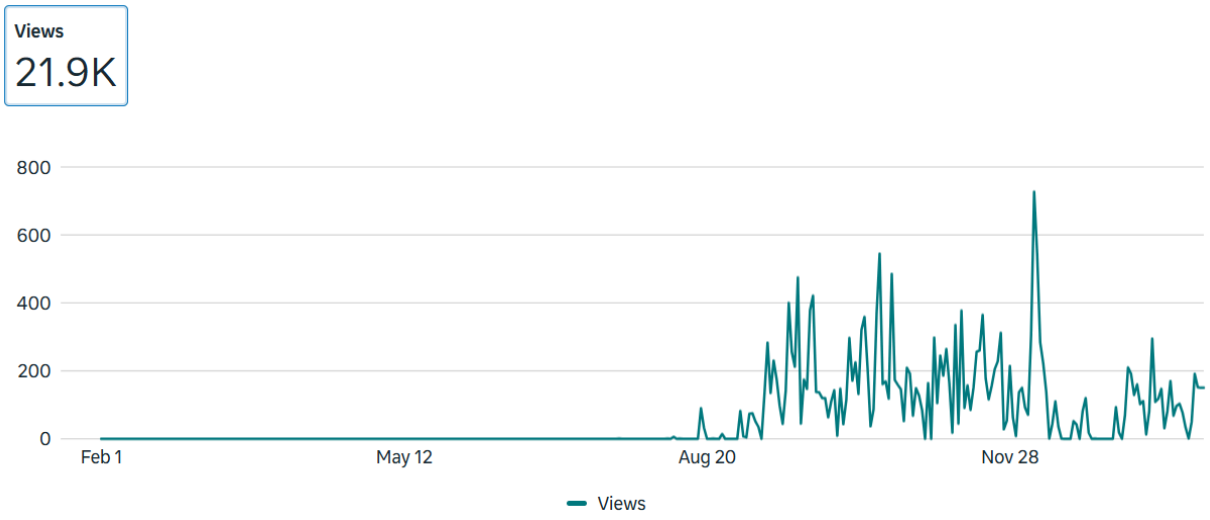

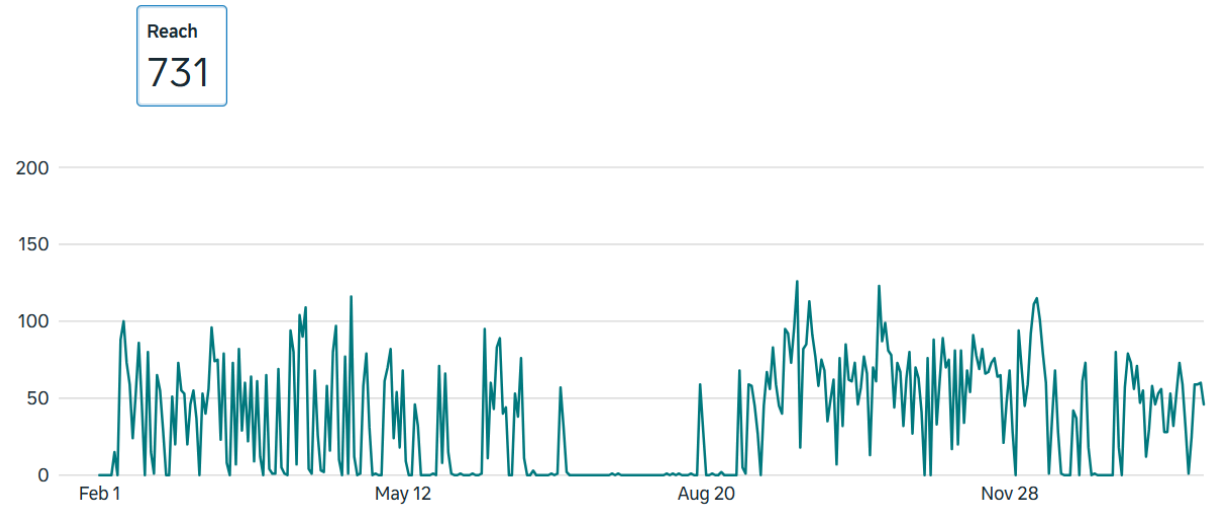

Figure 11:

7) Recommendations & KPIs

7.1 Growth and discovery

KPIs to watch

- **Reach** (**12 months**)**:** 10K (down 24.5%)
- **Follows** (**12 months**)**:** 178 (up 100%)
- **Views** (**12 months**)**:** 152.0K
- **Follower vs non-follower view split** (**90 days**)**:** 52.7% non-followers vs 47.3% followers

Recommendations

- **Emphasize content designed for non-followers**: highlight what the organization does, campus relevance… The 90-day data shows the account is getting meaningful non-follower views already.
- **Track Reach efficiency monthly:** when reach spikes, annotate what was happening (event season, collaboration, recruitment) to learn which periods are naturally good for growth.

7.2 Engagement quality

KPIs to watch

- **Content interactions (12 months):** 931 (up 100%)
- **Interactions (90 days):** 718
- **Accounts engaged (90 days):** 215
- **Follower share of interactions (90 days):** 80.9% from followers
- **Posts drive interactions (90 days):** 98.3% of content interactions

Recommendations

- **Continue what's working:** Posts are doing the heavy lifting for interactions, keep posts as the main format while testing reels/stories.
- **Watch engaged accounts vs total followers:** 215 engaged accounts out of 763 total followers suggests a meaningful "active core." Try to gradually grow the engaged base with consistent weekly content.

7.3 Content strategy (posts vs stories vs reels)

KPIs to watch

- **Views by content type (90 days):** Posts 70.3%, Stories 28.0%, Reels 1.7%
- **Stories (12 months):** 21.9K views, reach 731

Recommendations

- **Keep stories consistent:** Stories already account for 28% of views in the recent 90 days, and show strong yearly volume. Use them to amplify posts, drive event attendance, and keep the account active even when posting slows down.

7.4 Posting timing and consistency

KPIs to watch

- **Most active times** (**90 days**)**:** peak shown at 3PM, strong activity 12PM-6PM range

Recommendations

- **Schedule priority posts during 12PM-6PM**, with testing around 6AM/9PM.
- **Create a consistent posting schedule**.
- **Use event cycles:** Expect reach/views to spike around major campus moments, plan for content to ramp-up 1-2 weeks before.
