EDUCATION

University of Alberta

Edmonton, Alberta

Bachelor of Science in Computer Science, Minor in Psychology

Sep 2022 - Apr 2027

- **Relevant Coursework:** Discrete Mathematics, Algorithms, Intro Software Engineering, Computer Architecture, Database Management, Intro to Machine Learning, Reinforcement Learning, Ethics of Data Science and AI

EXPERIENCE

Student Software Engineer

Nov 2025 - Feb 2026

Develop for Good

Remote, California

- Developed and customized a WordPress website for a non-profit organization, translating requirements into a functional, user-friendly digital presence.
- Implemented custom themes, plugins, and site features using PHP, HTML, CSS, and JavaScript to improve usability, accessibility, and performance.
- Maintained site reliability through testing, debugging, and ongoing updates, improving site security, responsiveness, and content management workflows.

Internal Events Director

Sep 2025 - Present

TEDxUAlberta

Edmonton, Alberta

- Facilitated the planning and execution of large-scale internal events, including an annual conference, coordinating timelines, logistics, and programming for hundreds of attendees.
- Cooperated with cross-functional teams and executive members to ensure alignment on goals, budgets, and event deliverables.
- Oversaw venue coordination, scheduling, and vendor communication to deliver seamless events while adhering to organizational and university policies.

External Partnerships Coordinator

Sep 2025 - Present

UA-WiSE

Edmonton, Alberta

- Developed and maintained partnerships with corporate sponsors, campus departments, and community organizations to support programs empowering undergraduate students underrepresented in STEM.
- Secured funding, in-kind donations, and guest speakers by conducting outreach, drafting sponsorship proposals, and leading professional communications with external partners.
- Collaborated with internal executive teams to align partnership opportunities with organizational goals, increasing access to mentorship, internships, and professional development resources for members.

Student Data Engineer

Nov 2024 - Feb 2025

Develop for Good

Remote, California

- Designed and implemented scalable ETL data pipelines. Collaborated with managers and stakeholders to gather requirements and develop custom solutions.
- Automated data workflows using Google Cloud APIs, processing large datasets with Python and SQL to improve efficiency.
- Developed interactive dashboards, enabling clients to track KPIs. Gathered and analyzed feedback from end-users to continuously improve reporting tools.
