organizer storyboard

Admin storyboard

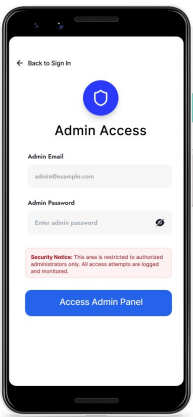

The Admin storyboard illustrates how administrators securely access the system and monitor overall platform activity. From the Admin Dashboard, administrators can browse and moderate events (US-03.04.01), remove inappropriate events (US-03.01.01), review and remove uploaded images (US-03.03.01, US-03.06.01), browse user profiles (US-03.05.01), remove organizers who violate policies (US-03.07.01), and review notification logs to ensure proper system use (US-03.08.01). This flow ensures content moderation, policy enforcement, and overall platform integrity.

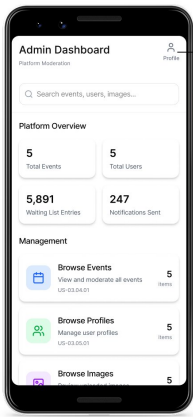

US-03.04.01 - Remove Events
